12/11/2015	SB1600062	1700 NEW YORK AVE NW	We will perform a total of two soil borings on the site. Each of the borings will be advanced to a depth of 30 feet below existing site grades, and will be located within the bounds of the private property. The borings will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole. 12/11/2015	SB1600063	1150 15TH ST NW	We will perform a total of two soil borings on the site. Each of the borings will be advanced to a depth of 60 feet below existing site grades, and will be located within the bounds of the private property. The borings will be drilled utilizing 3.25-inch hollow stem, continuous flight augers. The borings will be performed utilizing an ATV-mounted drill rig and will generate an approximate 6-inch annulus. After geotechnical exploration is completed, the borings will be backfilled with bentonite slurry, which has a consistency of two pounds bentonite powder to one gallon water. Borehole abandonment will be performed by tremie-grouting via a positive-displacement pump from the bottom of the borehole. 12/4/2015	BCIV1400140	1433 35TH ST SE	DDOE is installing a stormwater conveyance system on DC owned parkland near the end of 35th Street SE. The restoration work will consist of providing stable conveyance and water quality treatment of an unstable stream channel located within Pope Branch Park. This involves the creation of approximately 4770 linear feet of stormwater conveyance channels, using the regenerative stormwater conveyance approach which includes a series of rock structures and pools with an underlying sand seam. Native vegetation along the proposed channel will provide additional stability and habitat improvements. This project will have beneficial impacts to habitat and water quality.
